$(\mu, \nu) = (0.1, 0.1)$
$(\mu, \nu) = (0.1, 0.2)$
$(\mu, \nu) = (0.2, 0.1)$
$(\mu, \nu) = (0.2, 0.3)$
(a) Partition-function normalization
$R_Z = \nu Z/(2 \ln \tau)$
$R_Z \to 1$
$\tau = k_B T/m$
(b) Heat-capacity normalization
$R_C = C_V/\ln \tau$
Continuum guide: 1
$\tau = k_B T/m$
